## PROFILE

I'm Hasnain Ahmad, a 4th-semester Computer Science student at FCIT (Old Campus), passionate about Python development. I'm currently exploring Django and Flask, while building a strong foundation in HTML, CSS, and JavaScript. I love solving problems and aim to grow through real-world projects and meaningful tech connections.

## EDUCATION

Punjab University Lahore PUCIT	2023--Present
BS Computer Science	
Punjab Group of Colleges Mailsi	2020-2022
FSC	
Hawks Pre Cadet School System Mailsi	2018-2020
Matriculation	

## EXPERIENCE

### Mavericks United — Business Development Automation (19-05-2025-19-07-2025)

- Developed and deployed web scraping scripts to automate data collection for business development pipelines.
- Utilized tools like Selenium, BeautifulSoup, and undetected-chromedriver to extract structured data from dynamic websites.
- Built and maintained data pipelines feeding lead generation and market analysis tools.
- Ensured scraper reliability by handling dynamic content, pop-ups, delays, and anti-bot mechanisms.
- Collaborated with the BD team to understand lead qualification criteria and integrated filters accordingly.
